

About Us

We are a technology enabled company driven to help companies towards more competitive and efficient solutions. Our patented foaming technology results in greater weight savings and cycle time reductions and allows for higher contents of recycled material than conventional injection molding technology.

What can we do for you?

Our goal is to be your trusted intellectual property partner.

Total solution provider

Partner for patent protected articles

New innovative design capabilities

Flexible Pricing Models

Customized pricing based on customer needs.

Custom material additive blends
